Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Thermoforming Machines for a Variety of Production Levels

The Ossid RePack ReeForm thermoforming packaging machine offers a wide range of models to meet customer individual requirements. ReeForm thermoforming machines include entry-level, flexible, and compact models up to high-performance machines.

ReeForm high-performance thermoforming machines process flexible and rigid film, with different thicknesses, several film widths, forming depths and cut-off lengths.

The ReeForm machine frame and sheeting are all stainless steel for easy sanitation in wash down environments. The easy open frame allows access to check, adjust, and repair all parts of the machine. ReeForm solutions minimize downtime while maximizing productivity and output.

Several options with different features can be added to the machines to fulfill any packaging demand.

Features & Benefits

- Stainless steel construction
- Remote access
- Production reporting
- SMC pneumatics
- IP 65 sanitation rating
- Complete range of equipment to best fit your application

Package Types

Ambient

Modified atmosphere packaging (MAP)

Vacuum skin pack (VSP)

Flexible packaging

Foil-Foil packaging

Semi-Rigid packaging

Rigid packaging

Re-closable packaging

Microwaveable packaging

Oven safe packaging

Sealing solutions

Tray pre-cut

90 degree cut

Euro hole

Easy open

Cut with round corner

Zig zag cut

Options

Remote monitoring and diagnostics available

Integration and supply of thermal transfer printers, printers, labelers, etc.

Integration of product feeder/loaders, fillers, etc.

Pre heat station

Package development and prototyping services

Other control packages available
