Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Semi-Automatic Tray Sealer

The Ossid RePack ReeTray 30 semi-automatic tray sealing machine is designed to meet the production needs of small to medium size processors. It is also ideal for large processors who test market products in a laboratory setting prior to product launch.

The ReeTray 30 is simple to set up, and its functionality makes this entry level machine a great first step into packaging machinery. It can produce ambient, modified atmosphere packaging (MAP) and vacuum skin pack (VSP). Featuring rugged stainless steel construction, manual or semi-automatic drawer feed and interchangeable tooling that delivers fast changeover between tray sizes.

Features & Benefits

Stainless steel design
Manual or semi-automatic drawer feed
