Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Designed for Producing Large Bags and Bags with Fitments

The General Packaging 48 vertical bagging machine is an extraordinarily heavy-duty VFFS machine. This bagger is designed for applications where pumps or fitments are applied to bags and for high-speed production of large bags.

The high-pressure sealing jaws are actuated by hydraulic pressure from a self-contained system.

## Features & Benefits of Models 48 and 48W

Heavy-duty film transport system with stepper drive motors for supported or unsupported packaging materials

Vacuum film gripping belts handle a wide range of standard packaging materials with less belt wear

Friction belts available for porous materials

Easy and quick no-tool changeover from one bag size to another

Hydraulically-powered seal bars apply high pressure to seal multiple layers of heavy packaging materials

## Control Features of Models 48 and 48W

Touch-screen for data display

Sealed keypad for data entry

Displays set temperature and actual temperature

Displays timing values and function

Stores recipes of programmed values for multiple product/package sizes

Help screens to assist in operation and troubleshooting

Machine fault indications

Programmed interface with weigh scales, combination scales, auger fillers, volumetric cup fillers, liquid fillers

Optional computer interface

## Options & Accessories

Gas relief valve or fitment applicator

Roll leaf or ink printer

Modified atmosphere packaging (MAP), gas flushing

Bag in bag models

## Types of Bags

Pillow

Gusseted

Three side seal

Square bottom

## Types of Fitments for Dispensing Liquids

Valve

Fitment

Cap

Pump

Large fitment

## Powders and Granular Products
