Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Quick Changeover for Small and Large Bags

The Matrix Elete DS13 & DS18 are vertical form fill seal machines designed for a wide variety of industries. With benefits such as tremendous value for the dollar and quick changeover and setup, working with these machines ensure speed and precision.

The Matrix Elete Series is a high-performance totally configurable solution for small and large bags. With automatic film tracking, a stainless steel frame, and optional printer, labeler, or printer options, and multiple valve applications, this equipment leaves customers completely satisfied. The cycle speed reaches up to 100 BPM. When you need quality machinery for your production, the Elete 13/15 and Elete 18/20 are highly reliable.
