Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Produce Custom Foam Protective Packaging On Demand

Sealed Air foam molding systems produce custom-shaped Instapak cushions on demand.

Sealed Air Instapak foam molding systems produce custom-shaped cushions for products that require the consistent, precise fit of engineered protection. There is an Instapak foam molding solution to suit every operation, regardless of volume, throughput, or configuration.

Available Instapak foam molding models include the iMold, Instamolder, Twin Vertical System, and Molding Wheel. For applications that require a precise fit with uncommon shapes or dimensions, our experts can design and develop custom mold solutions with an integral workstation at one of Sealed Air's Packaging Application Centers.

Features & Benefits

Foam molding equipment uses Instapak foam technology, an economic solution that doesn't compromise on product protection.

Various models and speeds fit all unique needs.

Easy-to-use displays with minimal setup.

Patented foam dispersion technology guarantees cushion consistency and strategically dispenses foam tubes or in bags.

Built-in air ejection system removes finished cushions from the mold cavity, freeing up labor to pack and ship instead of monitoring cushion production.

Superior Protection, Time Savings, and Reduced Waste

Instapak molded foam solutions deliver a consistent, precise fit for the most demanding of applications.

Damage Reduction

A custom-engineered molded cushion provides the right amount of protection when and where you need it most.

Cube Optimization

Because each molded foam solution is custom to the product, packaging material is minimized and waste is eliminated.

Fulfillment Velocity

Instapak molding equipment can produce up to 10 cushions a minute, keeping pace with the most rigorous operations.

Customer Experience

Customers receive their product as intended in a neat, easy-to dispose package.

Please [contact Pro Pac](#) or call 888-318-0083 for your protective packaging equipment.

Instapak Twin Vertical Molding Station

The Twin Vertical Molding Station can consistently produce up to 100 cushions per hour. It features two separate mold cavities and requires only 12 square feet of floor space.

Electrical Power: 15 AMP, 110-120 VAC, Single-Phase with equal voltage from each phase to ground

Receptacle Type: NEMA5-15R

Instapak Molding Wheel

The Instapak Molding Wheel can produce up to 300 cushions per hour. The efficient design provides six mold cavities which require only 24 square feet of floor space.

Electrical Power: 15 AMP, 110-120 VAC, Single-Phase with equal voltage from each phase to ground

Receptacle Type: NEMA5-15R

Air Requirement: 100 p.s.i. Clean Dry Air

Instamolder High-Speed Cushion Molding System

The Instamolder system can produce up to 600 protective cushions an hour, ideal for high-volume operations. The unit comes in 8, 10 or 12 mold box configurations and only requires 50 square feet of floor space.

Electrical Power: 30 AMP, 208-240 VAC 60 Hz Single-Phase with equal voltage from each phase to ground, dedicated circuit

Receptacle Type: NEMAL6-30R

Air Requirement: 100 p.s.i. Clean Dry Air
