Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Multiple Batchmaster Counters & Weighmaster Weighers Working Together

Batching Systems provides complete engineered turnkey packaging solutions by combining Batchmaster counters and Weighmaster weighers with a Bagmaster 250, 400 or C295 bagger and conveyor.

Batching Systems kit packaging systems produce standard or multi-cell kit bags at up to 60 bags per minute. Up to 14 cell packs can be linked together with different print and product in each cell. Or two different kits can be run at the same time.

Batching Systems kit packaging systems offer refined interface and software data management, and real-time data for quick and easy diagnostics to help maximize production.

A modular design of counters and weighers adds versatility to lines. This modular capability allows fillers to be added to the system for expandability, or to be removed and used to fill an additional automated packaging machine when not needed on the line.

Batching Systems kit packaging equipment are wired for power, air and controls to allow the maximum number of fillers the load area will accommodate.

Features

- Syscom recipe management software
- Remote access
- Thermal printing on bags

- Bag counting into boxes
- Durability with less wear parts
- High accuracy and speed
- Sequential ramp up / ramp down
- Production records
- Error tracking and downstream reject
- Automatic empty or run-out
- Positive entry infeed funnels
- Multi-cell kit packaging
- Self diagnostics
- Safety and shut down alarms
- Touch screen displays
- Auto gate jam fault reset & start
- UL, cUL, & CE approved options
- Matching controls platform for baggers, counters, weighers, and conveyor

Applications

- Game pieces or multiple color toys
- Ready-to-assemble furniture
- Automotive aftermarket kits
- Multiple flavor packs of candy
- Surgical kits or medical device assemblies
- Promotional packs
- Electrical installation kits
- Communication installation kits
- Security fence installation kits
- Frozen mixed vegetables or food
- Hobby and craft kits
- Jewelry
- Crafts and beads
- Plumbing assemblies
- Sporting gear & accessories

Specifications

Power: 220 VAC, 3 Phase, 60 Hz @ 50 Amps

Air: No air or gate sensors are required for Batchmaster counter, Weighmaster belt feed or tray feed weigher Bagmaster bagger or conveyor requires 80-100 psi, clean dry air
