Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fast Automatic Bottle Indexing

The Ohlson high-speed bottle and jar filling container indexing system fills 2, 4, 6, or 8 containers at a time in a single double or quad lane indexing conveyor.

This system includes single, double, or quad lane indexing conveyor, entry chute lift, distribution pivot chutes, holding hoppers, vibratory channel feeders, and product settler to reduce jamming with sticky gummy products, and plungers to ensure product is below the neck of the bottle before it is capped or sealed.

Features

- Eight station positive entry chute lift
- Eight holding hoppers
- Eight distribution chutes
- Product settler filling eight containers
- Eight channel vibratory feeders
- Feed chutes gradually to avoid jamming
- Allows a large range of sticky gummies to flow
- Eight station plunger confirms product is below neck of bottle
- Tool-less, fast changeover
- PLC controls
- User-friendly, color touch screen interface

Production Rates

40 to 140 bottles per minute
