Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Automate Weighing and Counting

Ohlson linear weighing and counting systems are an ideal solution for automating your highly repetitive, labor-intensive processes.

Ohlson linear systems are highly customizable and range from single-lane to eight-lane models. Each lane typically does the work of four to five hand packers.

These systems are designed to be modular. Start with one or two lanes, and when needed, scale up your production by adding additional capacity.

Available in stainless or painted steel.

Features

Automate repetitive processes for major time and labor cost savings

Rugged build means your investment will last for years, possibly decades

Fully modular

Increase throughput simply by adding more Ohlson software for complete upstream/downstream integration

Highly sanitary and easy to clean

Wide range of customizable specs to suit your product and production requirements

Customizable specifications for weight depending on your product needs
