Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fast Accurate Liquid Filling

Ohlson piston fillers are designed and built for liquid filling applications, and integrate seamlessly with other Ohlson machines including vertical form fill seal baggers, premade pouch fillers, bottles, or other rigid containers.

The stainless steel design can also include water or oil heating elements for the storage tank to ensure proper product flow.

Features

60 liter source tank

Heating feature for water or oil

Connection for external source of liquid
