Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Direct Fill Gross Weight Scales

Weigh Right G-50 Direct Fill gross weight scales are designed to weigh product directly into the final rigid container such as boxes, tubs and pails. The Weigh Right G-50-E entry level scale is designed for semi-automatic operation. The G-50 fully-automatic scale comes with a powered roller indexing conveyor.

Gentle Loading: Product fills and weighs gradually into the box instead of being dropped all at once (as in net weighing). Good for products that are fragile, that may chip or bruise.

Low Height: Ideal for low ceiling facilities. Vibratory and belt feed designs offer versatility for many product types.

Features & Benefits

For food and non-food applications
