Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## High-Speed, Low-Cost Scale

The Weigh Right iQ-Shuttle scale redefines the weigh-and-fill market by providing a small, low-cost scale offering fill rates up to 80 fills per minute. A great option to a combination scale or multiple lane linear scale for medium and high-speed packaging applications.

## Features & Benefits

Up to 80 fills per minute

Low cost compared to multiple-lane scales or combination scales

Only 1 weigh hopper for simple maintenance

Quick changeover

Minimal contact surfaces to clean

Fits in a 4' cube

## How the Weigh Right iQ-Flip Scale Works

The iQ-Flip vibrates a continuous stream of product into a two-compartment high-speed oscillating weigh bucket that quickly flips from one compartment to the next once the target weight has been met in the first.

### iQ-Flip with Indexing Conveyor

The iQ-Flip is designed to fill nutmeats, small whole vegetables, coffee, seeds, granules, pellets and small candies into conveyed cans, jars, trays or tubs.

### iQ-Flip with Bagger

The iQ-Flip can be supported on a split support frame over the transition funnel of a bagger or mounted to the top plate on most vertical baggers. The short stack-up height is minimal compared to multiple lane linear scales and combination scales yet offering moderately high-speed filling.

## Production Rates

1 oz to 4 oz: 70-80 fpm

4 oz to 16 oz: 60 fpm

1 lb to 2 lbs: 40 fpm

2.5 lbs to 3 lbs: 30 fpm

3.5 lbs to 5 lbs: 20 fpm
