Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fruit Fillers for Retail Size Packages

Weigh Right SDS tray filling scales are designed to net weigh 15 to 40 lbs. of gummy vitamins, gel tablets, and other products requiring storing in vented or solid-bottom shallow drying trays. The SDS also perfectly weighs and dispenses fragile fruit products into cartons.

Both trays and cartons can be run on the same system with simple tool-less change parts.

SDS-V Vibratory and SDS-B Belt Feed Scales

Weigh Right SDS scales can be built with either vibratory or belt feed design depending on the product's flow characteristics and how the product is packaged. The vibratory design (SDS-V) handles free-flowing products while the belt feed design (SDS-B) handles less free-flowing products.

Features

Gentle Loading: Bombay door releases product gently onto the tray.

Large Weigh Bucket: Larger weigh bucket allows for greater disbursement onto the tray.

Low Height: Ideal for facilities with low ceilings.

Versatility: Vibratory and belt feed designs offer versatility for many product types.

Products

Most dry or semi-sticky products needing to be weighed and dispensed into trays.

Free flowing gummies

Semi-sticky gummies

Gel caps

Vitamins
Small whole fruit
