Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Volumetric Filling Systems for Powder and Granular Products

Weigh Right A Series high-speed volumetric fillers dispense 1 oz to 10 lbs of powders and granular products with advanced dust control.

The A series volumetric fillers are more versatile and gentler on products than a standard auger feeder. These systems handle a large range of powders and granular products like ground spices, seasoning blends, health powders, ground coffee, detergents, chemicals, drink mixes, cake mixes and similar products.

Product comes through the supply hopper inlet and fills a cavity in the rotor. As the rotor cycles the product is portioned out by the meter valve and streams into the container for gradual air displacement.

This design puts negligible friction on the product and contains dust. No change parts are needed when changing package weights.

Features & Benefits

- For food and non-food applications
- Low friction product handling
- Dust tight containment
- No change parts needed when changing package weights
- Semi-automatic and fully-automatic models

Products

Ground spices
Seasoning blends
Health powders
Ground coffee
Detergents
Chemicals
Drink mixes
Cake mixes
Flour

Options

Casters for portability
Supply hopper vibrator
Support frame to fit over bagger
Container indexing conveyors
Attachable spouts to suit containers
Supply hopper cover with 6" flange
Diving spout to provide a clean fill
Vibrating table to settle product
Unscrambler table
Accumulation table
